

ROAD RESURFACING ON A MAJOR THOROUGHFARE IN DEKALB COUNTY IS UNDERWAY

Multiple resurfacing transportation projects have been completed in DeKalb County, and others are well underway thanks to the one-cent Special Purpose Local Option Sales Tax (SPLOST). This “voter-approved program”, funds a variety of transportation projects including road resurfacing, pedestrian facilities, and new trails. To date, DeKalb County SPLOST has completed over 150 miles of road resurfacing throughout the county.

Pittman Construction Company has underway approximately 1.92 miles of roadway resurfacing on Pleasantdale Road from Tucker Norcross Road to: I-85. This improvement to the road will help to enhance travel safety for motorist and roadway facility users. Maintaining roads on high frequency thoroughfares is beneficial to the county and safety of the public..

Dollars generated from DeKalb SPLOST have funded major county-wide transportation projects. CEO Michael Thurman and the Board of Commissions are in support of DeKalb SPLOST, which will generate an estimated \$388 million in revenue over a six-year period to improve county roads, infrastructure, libraries, parks, and public safety. For more information visit www.DeKalbSPLOST.com or follow the conversation on social media using hashtags #DeKalbSPLOST and #AllThingsSPLOST.
